Large Distribution Digger Derrick

Altec B-Series derricks are a staple of the electric utility and telecom industries. B-Series includes a 43 gpm variable displacement piston pump which reduces hydraulic heat generation, fuel consumption and chassis wear. Additionally, optional radio remotes integrate directly with the control system unlike fully hydraulic derricks and are offered with HOP indication. Additional features and options like standard and low speed for unit function, optional electronic side load protection with load gauge and RotaFloat® help to provide safety and productivity at the jobsite.

* Includes turret winch, pole guides, boom flares, no digger.

Standard Features:

- Multi-Lever Control Station Riding Seat
- Five Function Hydraulic Overload Protection System (HOP)
- Standard/Low Speed Selector
- Insulating Fiberglass Third Stage, Rated to 46kV and Below
- Fiberglass Boom Tip and Transferable Steel Boom Flares
- Hydraulic Side Load Protection
- 15,000 lb Worm Gear Turntable Winch with Rope Guides
- Hydraulic Tilting Pole Guides with Interlock
- 12,000 ft-lbs Digger Motor, Two Speed Mechanical Shift
- Hydraulic Auger Release
- Boom and Auger Stow Protection

Optional Features:

- Altec Opti-View® Riding Seat
- Altec Electronic Side Load Protection with Load Gauge
- Altec RotaFloat®
- Radio Remote Derrick Controls with HOP Indication
- Docking Station for Radio Upper Controls
- Integrated Multi-Lever Upper Controls
- Pole Guide Tong Protectors
- Single or Dual Platform(s)

Recommended Features:

- AXIS Service Interface Kit
- Fall Protection System
- Platform Liner
- Wheel Chocks
- Outrigger Pads
